

### Call for Papers ~ HYDRO 2015 ~ Bordeaux, France (26-28 October 2015)

Dear Colleagues

This is a reminder that the **Call for Papers for HYDRO 2015** has been published, and the deadline for submitting an abstract is **6 February**. Delegations from about 80 countries are expected to come together again, to focus on a broad range of themes, with the common aim of **Advancing Policy and Practice** in global hydropower development. If you are active in hydro plant planning, construction, engineering, financing, operation or maintenance, etc., then we encourage you to submit an abstract for consideration for the conference programme (but only if you or a colleague would attend HYDRO 2015 to present it). To download the Preliminary Bulletin and Call for Papers, please click [here](#) (and then click the "Brochure PDF" button at the bottom of the page). HYDRO 2015 will be co-hosted by EDF (Electricité de France), with strong support by CNR (Compagnie Nationale du Rhône) and other major players in the French hydro industry, as well as other organizations.

A major **Exhibition** will run alongside the conference. Further details, including a floor plan and list of exhibitors booked so far, can be found [here](#). If you are interested in having an exhibition stand or co-sponsoring part of the social programme, then we invite you to contact our Sales & Marketing team (Lukas Port ~ Maria Teresa Loredo ~ Melanie Ganz) as soon as possible, because stand spaces are already limited: [Sales@hydropower-dams.com](mailto:Sales@hydropower-dams.com)

Photos taken at last year's HYDRO 2014 in Cernobbio, Italy (in October 2014), can now be seen and downloaded free of charge, by clicking [here](#). A report of the **key outcomes of HYDRO 2014** was published recently in Issue Six 2014 of *Hydropower & Dams*. If you do not already have a personal subscription to the journal, and would like to order one now for 2015, we would be happy to send you a complimentary copy of Issue Six 2014, giving you an opportunity to see the comprehensive overview of the Conference. Please request Issue Six 2014 when ordering a new personal subscription for 2015 ([subs@hydropower-dams.com](mailto:subs@hydropower-dams.com), or use a printed order form or our [website](#) to order).

We are also pleased to give you a direct link [here](#) to our **Media Data for 2015**. The brochure has been substantially redesigned this year, to reflect some new developments. To receive a printed copy by post (if you don't usually receive our media/advertising information), please contact our Sales & Marketing team: [Sales@hydropower-dams.com](mailto:Sales@hydropower-dams.com)

With kind regards

Margaret Bourke
